Career objects

Motivated BCA student with a strong foundation in computer science and hands-on project experience in cybersecurity. Skilled in java and Python with a keen interest in software development and secure system design. Seeking an internship opportunity to apply technical knowledge, enhance problem-solving abilities, and contribute to innovative project while gaining practical industry exposure.

Education

Bachelor of Computer Applications (BCA) GFGC Tiptur 2023-2026

Skills

Programming Languages: Java (Beginner), Python (Beginner), C(Basic), SQL

Cybersecurity: Fundamentals of Cyber Security, Graphical Password Authentication

Core Concepts: Database Management, Data Structures, OOP

Academic Projects

1. College Complaint Management System

A web-based system developed using Python that allows students to submit complaints online and track their status. The system ensures secure login and efficient management of complaints by administrators.

2. System to Track Personal Data Sharing & Identify Privacy Risks

A Python-based system designed to monitor personal data sharing activities and identify potential privacy risks. It uses rule-based logic to improve digital privacy awareness and secure data handling.

Certifications

- Certified in Network security and cyber security
- Certified in Cloud computing and IOT

Strengths

- Quick learner
- Strong analytical thinking
- Dedicated and self-motivated
- Adaptable to new technologies
